Why Smink tiles?

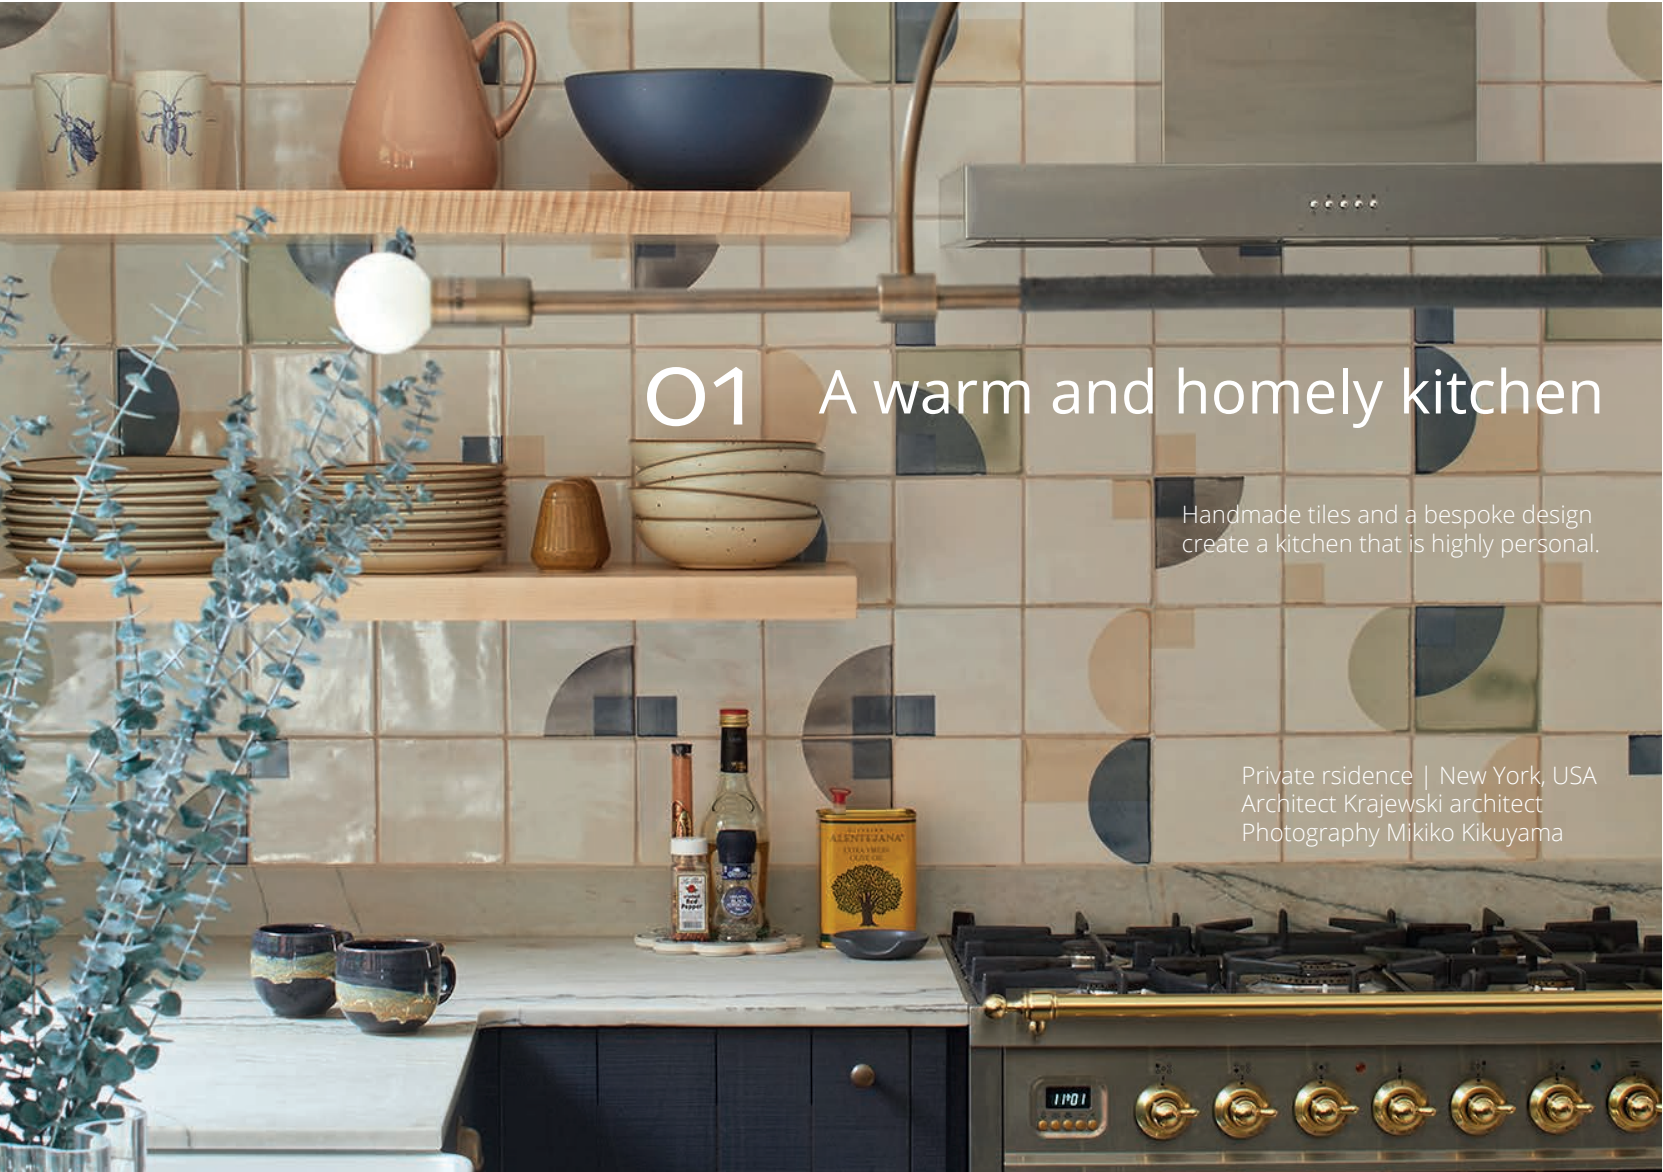

Smink Studio tiles are handmade and unique. It takes around a month to make each tile and the surface tells the story of its production.

TWELVE INSTALLATIONS WE LOVE

A kitchen scene featuring a backsplash of handmade tiles with geometric patterns in beige, blue, and green. Two wooden shelves hold various ceramic items: a terracotta pitcher, a dark blue bowl, and several plates and bowls. A brass rod with a white spherical light fixture hangs in front of the shelves. On the countertop, there are two mugs, a small plant, and some kitchen items. A stainless steel range hood is mounted above the stove, and a gas stove with brass knobs is visible at the bottom right.

A hallway with a floor made of square tiles, each featuring a different geometric pattern in shades of blue, green, and white. The walls are made of light-colored wood. On the left, there is a glass door leading to a bathroom. At the end of the hallway, there is a black metal railing and a window with a black frame. The lighting is bright and even.

04 A colour coordinated floor

Special pressed tiles bring screen-printed colours to a hall floor.

A walk-in shower wall covered in colorful tiles. The tiles are primarily white and cream, with accents of orange, pink, and red. The patterns include solid colors, semi-circles, and squares. A small, square, recessed shelf is built into the wall. A window with a green frame is visible on the left side of the image.
